Para ken ficav gʻ hun bixena et ina regetián usumol R^2 $\frac{\mathbb{Z}\left(\eta_1-\tilde{\gamma}\right)^2}{175} = \frac{\mathbb{Z}\left(\tilde{\gamma}_1-\tilde{\gamma}\right)}{6^{\frac{3}{2}}5} + \frac{\mathbb{Z}\left(\tilde{\gamma}_2\right)}{R^{\frac{3}{2}}5} - \cos \mathbb{T}\left(\tilde{\gamma}_1+\tilde{\gamma}_1\right)^5$ $R^2 = 4 - \frac{\mathbb{Z}(\tilde{\gamma}_2)^2}{4}$ R2 = 1 163

R2 = 1 163

R2 = 1 164

R3 = 1 Up a $p(2/2)(p+p) \leq (p+1) \leq \frac{p+p}{p+p}$ for p and p and
